

Carbon Cost

- **Just when the government has announced net zero by 2050 and Oxfordshire Council has committed to become carbon neutral by 2030 and for Oxfordshire as a whole by 2050, Thames Water decide to embark on the largest industrial project in Europe.**
- **Thames Water's own carbon estimates are 'immature' and very poorly done. They need to be completely reworked.**
- **Delaying the reservoir until 2050 would allow less carbon intensive projects to be completed first.**
- **If still needed after 2050, it could be completed at much less carbon cost.**
- **Are we in a climate emergency or not?**
